

STATISTICAL VALIDATION
Nose Cone lies on the 57.2% ellipse
Fuselage lies on the 72.6% ellipse
Conclusion: COHERENT (Explained by Sim)

- Extreme Trajectories
- Nominal Trajectory
- Nominal Failure Trajectory
- Nominal Failure Impact
- Simulated Impacts
- 50% Containment (Bivariate Normal)
- 90% Containment (Bivariate Normal)
- 95% Containment (Bivariate Normal)
- 99% Containment (Bivariate Normal)
- Launch Pad (Origin)
- Nose Cone Landing Site
- Fuselage Landing Site
